Results of Operations

Three months ended December 31, 2011

The company had a net and comprehensive loss of $81,789 for the three months ended December 31, 2011 compared to a net loss of $14,125 for the three months ended December 31, 2010. The increase in loss is due to the fact that the company continues to be engaged in the search for a qualifying transaction.

Expenses consisted of $5,055 of travel expenses (2010 – $3,700), consulting of $63,531 (2010 – nil), professional fees of nil (2010 – $10,420), and office and filing fees of $13,203 (2010 - $5).

Liquidity and Capital Resources

As at December 31, 2011 the Company had working capital of $3,677,326 (2010 - $288,463), an accumulated deficit of $319,850 (2010 - $75,465) and cash on hand of $3,711,758 (2010 - $293,444). During the three months ended December 31, 2011, operating activities provided cash of $148,325 (2010 – used cash of $59,990). Cash on hand in the amount of $1,639,232 has been classified as restricted funds in accordance with the terms of the issuance of the Special Warrants.

From March 23, 2010 to April 29, 2010 the Company raised $175,000 from a private issuance of 3,500,000 common shares. On August 30, 2010 the Company raised net proceeds of $170,314 (net of share issue costs of $29,686 paid to the brokers) from its IPO by issuing 2,000,000 common shares at $.10 per share for gross proceeds of $200,000. On March 2011 the Company raised $1,557,716 (net of share issue costs of $62,244 paid to certain arm’s length finders) from a private placement of 2,699,934 common shares at $0.60 per share for gross proceeds of $1,619,960.

To date the Company’s sole source of income has been the issuance of equity securities for cash. The Company has issued common shares pursuant to private placement financings with management and third parties as well as through an IPO. The Company’s access to financing is always uncertain. There can be no assurance of continued access to significant equity financing, or that such access will be timely and in the amounts necessary to fund the Company’s activities. There are many conditions beyond the Company's control which have a direct bearing on the level of investor interest in the purchase of the Company securities.

The financial statements have been prepared on a going concern basis which assumes the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. These financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence. The continuing operations of the Company are dependent upon its ability to identify, evaluate and negotiate an acquisition of, a participation in or an interest in properties, assets or businesses and raise adequate financing to sustain such operations in the future. Management is also aware that material uncertainties exist, related to current economic conditions, which could cast significant doubt upon the entity's ability to finance current and future activities.

The Company does not have "standby" credit facilities, or off-balance sheet arrangements and it does not use hedges or other financial derivatives. Further, the Company has no lines of credit or other sources of financing which have been arranged but as yet unused.

The Company has sufficient capital resources to meet current operations and short term plans. Regardless, additional capital will be required in the longer term. The ability to raise additional funds may be impaired or such financing may not be available on favourable terms, due to conditions beyond the control of the Company, such as continued uncertainty in the capital markets and depressed commodity markets.

Critical Accounting Estimates and Accounting Policies

The preparation of the Company's financial statements requires the Company to use estimates and assumptions that affect the reported amounts of assets and liabilities. The Company's accounting policies are described in Note 2 to the Companies unaudited Financial Statements.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements that are likely to have or are reasonably likely to have a material current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that have not been disclosed in the Company's financial statements.

Related Party Transactions

On August 30, 2010 the Company granted options to the Company's directors and officers to purchase up to an aggregate of 250,000 common shares of the company at an exercise price of

$.10 per share. The options vested on August 30, 2010, the date the common shares of the Company were listed for trading on the TSX Venture Exchange. The options are exercisable for five years from August 30, 2010, the closing date of the Company's initial public offering of securities. The value of the options is recorded as stock based compensation and determined at $18,615 using the Black-Scholes option-pricing method. As at December 31, 2011, there have been no other related party transactions since the Company's inception.

("TGI"). TGI is a British Columbia based privately held mineral exploration and development company whose principal assets are located in the country of Tanzania. The acquisition of TGI and its assets remains subject to a number of terms and conditions but if completed would become the Company's qualifying transaction. Under the agreement, as at December 31, 2011, the Company would issue 11,042,614 common shares of the Company and rights to receive an additional 5,200,000 common shares. The rights are to be converted to common shares of the Company upon TGI completing the acquisition of certain concessions within 90 days of the execution of a definitive agreement with the Company. Upon closing $760,501 in loans advanced by shareholders of TGI will become repayable by the Company.

In relation to the acquisition the Company has agreed to lend TGI up to $500,000 for working capital purposes. The loan bears interest of 4.0% per annum compounded semi-annually, commencing from the date of each advance. The interest is to be repaid upon repayment of the loan. The loan amount is to be repaid upon closing of the Agreement (or any replacement definitive agreement). If the Agreement does not close the due date will be the earliest of 12 months following the date of the first advance or the date TGI completes a financing at least equal to the amount owing. TGI has also agreed to pay a bonus payment equal to 4.5% of the loaned amount upon maturity. The loan is secured by the assets of TGI.
