Nature of Business

The Company was incorporated under the British Columbia Business Corporation Act on March 16, 2010. The Company is a Capital Pool Company ("CPC") as defined in Policy 2.4 of the TSX Venture Exchange ("TSX-V or Exchange"). As a CPC, the Company's principal business is to identify, evaluate and acquire assets, properties or businesses which would constitute a qualifying transaction in accordance with Policy 2.4 of the Exchange ("Qualifying Transaction"). Such a transaction will be subject to shareholder and regulatory approval. The address of the

Company’s registered office is 409-1080 Mainland Street, Vancouver British Columbia, Canada, V6B 2T4.

On August 10, 2010 the Company filed a prospectus with the British Columbia and Alberta Securities Commissions offering 2,000,000 common shares at $.10 per share as an initial public offering (“IPO”). The IPO was completed on August 30, 2010.

Subsequent to the year ended June 30, 2012, the Company completed their QT by acquiring 100 per cent of QMX Gold Corporation’s (“QMX”) rights, titles and interest in the Rouyn-Noranda base-precious metal camp in Quebec, Canada. The Company has commenced trading as a Tier 2 Mining Issuer on the TSX-V under the symbol “FPC”. To complete the QT, the Company paid QMX $5,000,000 and issued 7,000,000 shares. Upon completion of the QT, the Company is now in the business of exploration and evaluation of these exploration and evaluation assets to determine whether or not these properties contain mineral reserves that are economically recoverable.

Overall Performance

As announced on November 17, 2011, the Company had negotiated the terms and conditions of a formal Share Exchange Agreement (the “Agreement”) whereby the Company intended to purchase the outstanding shares of TransAfrican Gold Inc. (“TGI”). Pursuant to the Agreement, the Company issued 3,894,136 special warrants at $0.55 each to raise gross proceeds of $2,141,775 and incurred finders’ fees of $77,411. Upon certain conditions being met, the special warrants were convertible into common shares of the Company on a 1:1 basis. The Company loaned TGI $430,335 for working capital purposes bearing an interest rate of 4.0% per annum and payable upon closing of proposed transaction with TGI. On April 11 2012, it was determined that TGI was in default of the Agreement, therefore the transaction was formally terminated. The release conditions of the special warrants had not been met and, consequently, the Company cancelled all issued and outstanding special warrants and refunded all remaining proceeds from the special warrants. As stated in Note 5 of the audited annual financial statements for the year ended June 30, 2012, the Company has agreed to collaborate with special warrant holders to collect the refundable deposit and the loan by forming Druk Loan recovery Corp. (“Druk Recovery”) to enable administration of the collection process. The Company owns 24.7% of Druk Recovery, however there is uncertainty regarding the collection of the refundable deposit so the Company has written down its investment in Druk Recovery to zero. Any future recovery of the deposit will be recognized through the statements of loss and comprehensive loss as a recovery of investment.

On September 12, 2012, the Company entered into a purchase agreement with QMX, a company incorporated in Ontario and listed on the Toronto Stock Exchange, which constituted the Company’s QT. To finance the purchase agreement, the Company raised gross proceeds of $6,500,000 by issuing 26,282,000 subscription receipts at $0.25 each, which were converted into common shares of the Company upon completion of the QT. The Company incurred cash finders’ fees of 3.5% of the gross proceeds raised and issued 440,000 finders’ shares at $0.25 per share.

The Company’s business, operating and financial condition could be harmed due to any of the following risks. The risks described below are not the only ones facing the Company. Additional risks not presently known to the Company may also impair its business operations.

Exploration and Development Risks
Mineral exploration involves many risks, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. Operations in which the Company has a direct or indirect interest will be subject to all the hazards and risks associated with exploration, development and production.

Insurance
The Company's involvement in the exploration for natural resources may result in the Company becoming subject to liability for pollution, property damage, personal injury or other hazards and any insurance the Company may have may not be sufficient to cover the full extent of such liabilities.

Prices, Markets and Marketing of Gold and Metal Prices
World prices for commodities fluctuate and are affected by numerous factors including international economic and political trends, expectations of inflation, currency exchange fluctuations, interest rates, global or regional consumptive patterns, speculative activities and increased production due to new mine developments and improved mining and production methods. The effect of these factors on the price of commodities, and therefore the economic

Liquidity and Capital Requirements
Management anticipates that, subject to financing, it will make substantial capital expenditures towards developing the Trout Property. However, there is no assurance that the Company will operate profitably or will generate positive cash flow in the future. The Company may require additional financing in order to proceed with the exploration and development of the Trout Property and to sustain its business operations if it is not successful in earning revenues. The Company may also need further financing if it decides to obtain additional mineral properties. The Company's future may be dependent upon its ability to obtain financing. If the Company does not obtain such financing, if required, its business could fail and investors could lose their entire investment.

Environmental Risks
All phases of the mineral exploration and development business present environmental risks and hazards and are subject to environmental regulations. Compliance with such legislation/regulations can require significant expenditures and a breach could result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner which may lead to stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs. No assurance can be given that the application of environmental laws to the business and operations of the Company will not result in a curtailment of exploration or production, a material increase in the costs of production, development or exploration activities, or otherwise adversely affect the Company's financial condition, results of operations or prospects.

Government Regulation
The natural resource exploration industry is subject to controls and regulations imposed by various levels of government. It is not expected that any of these controls or regulations will affect the
operations of the Company in a manner materially different than they would affect other natural resource exploration companies of similar size. The current legislation is a matter of public record and the Company is unable to predict what additional legislation or amendments may be enacted.

Markets for Securities
There can be no assurance that an active trading market in the Shares will be established and sustained. The market price for the Shares could be subject to wide fluctuations. Factors such as commodity prices, government regulation, interest rates, share price movements of its peer companies and competitors, as well as overall market movements, may have a significant impact on the market price of the Shares.

Reliance on Key Individuals
The Company's success depends to a certain degree upon certain key members of the management. It is expected that these individuals will be a significant factor in the Company's growth and success. The loss of the service of members of the management and certain key employees could have a material adverse effect on the Company.
